

Amendments to the Claims:

1 - 13. (canceled)

14. (previously presented) An apparatus for harmonizing energy in Auyverdic therapy with non-ionizing low level bio-energy, said apparatus comprising:

a power source for providing power to light sources which generate light beams for healing purposes,

said light sources being arranged in multiple independently operable arrays of both visible and invisible light emitting devices for providing a harmonizing effect on the body by balancing all the energy centers of the body wherein each of said light source arrays is controlled automatically by a respective one of plural preset protocols, each said protocol defining wavelength, intensity, dosage and treatment values suitable for treatment of a different part of the body.

15. (previously presented) The apparatus of claim 14, further including a plurality of different applicators including probes, ear probes, wands and arrays to provide non-ionizing bio-energy for treatment.

16. (original) The apparatus of claim 15, wherein the applicators can be turned on or off as needed during treatment.

17. (canceled)

18. (currently amended) The apparatus of claim 16, wherein each applicator is capable, independently of the remaining applicators, of receiving the preset protocols from ~~said~~ a central microprocessor.

19. (currently amended) The apparatus of claim 8 15, wherein the applicators are made of a plastic material having low thermal and electrical conductivity.

20. (currently amended) The apparatus of claim 8 14, further comprising software adapted to control a count down clock which automatically shuts off the apparatus at a preset time.
